

ADDENDUM C

VERB LIST

ACTION VERB LIST

Acknowledge	To recognize and respond to an indication of alarm.
Actuate	To put into mechanical action or motion.
Adjust	To bring a continuous effort into proper or exact position.
Align	To adjust or correct relative position of an item.
Alternate	To change or substitute one to another.
Analyze	To break down a complex whole into its component parts.
Announce	To give notice of an event or evolution via the public address system.
Answer	To respond to a request for information.
Anticipate	To give advance thought, discussion or treatment; to foresee.
Apply	To bring into action; to put into operation.
Assemble	To fit together parts into a complete structure or unit.
Assess	To determine the importance, size, or value.
Assist	To give support or aid.
Authorize	To legally approve an action; to empower.
Backwash	To move air or water backward by a propelling force.
Balance	To equalize opposing forces.

Begin	To commence or initiate.
Bleed	To extract or cause to escape from a contained source.
Block	To obstruct passage or progress.
Boil	To heat to the boiling point.
Borate	To add boric acid.
Build	To construct according to a specific plan or process.
Bypass	To avoid or circumvent.
Calculate	To determine by mathematical processes.
Calibrate	To detect, correlate, report, or eliminate by adjustment and discrepancy in accuracy of an instrument or measuring device being compared with the national standard.
Call	To communicate orally in person or by phone.
Center	To place or adjust around a center area or position.
Change	To replace.
Charge	To restore or load to capacity.
Check	To look at carefully or critically; to verify.
Choose	To select after consideration of alternatives.
Circulate	To flow in a circular path.
Clean	To free from dirt or contamination.
Clear	To free from obstruction or limitation.
Close	To bring or come to a natural or proper end; to cease operation.
Code	To assign symbols or signals (i.e., letters, numbers, words).
Collect	To bring together into one body or place.

Compare	To examine the character or qualities in order to discover resemblances or differences.
Complete	To bring to an end; having all necessary parts.
Compute	To determine by mathematical means.
Connect	To join or fasten together.
Control	To manage with authority.
Cool	To cause to lose heat or warmth.
Correct	To alter or adjust to a required condition or standard.
Construct	To make or form by combining parts.
Decide	To come to a conclusion based on available information.
Decrease	To make less (as in size, number, or intensity).
Deenergize	To disconnect energy or voltage.
Depress	To press down.
Deselect	To stop a selected function.
Detect	To discover the existence or presence of something.
Determine	To decide or resolve conclusively.
Diagnose	To recognize or determine the nature or cause of a condition by consideration of signs or symptoms.
Dilute	To make thinner, or diminish the strength of by admixture.
Direct	To assign activities to another person.
Disassemble	To take apart.
Disconnect	To sever or terminate a connection.
Display	To exhibit for visual evidence.
Dispose	To get rid of.

Dissolve	To cause to pass into solution.
Don	To put on clothing or equipment.
Energize	To impart energy or voltage.
Enter	To input data.
Establish	To make firm or stable.
Estimate	To appraise or establish value based on judgment or opinion.
Exit	To go out or go away.
Explain	To make understandable.
Feed	To supply a signal to an electric circuit.
Flush	To clean or wash out with a fluid.
Heat	To add energy to supply higher temperature.
Hoist	To raise into position using a tackle.
Hold	To retain by force; to apply continuous pressure.
Identify	To regard or recognize clearly.
Immerse	To plunge or dip into a fluid.
Increase	To add or enlarge in size, extent, quantity.
Inform	To communicate information.
Inspect	To examine officially; to determine the serviceability of an item by comparing its physical, mechanical, and/or electrical characteristics with established standards.
Install	To seat, or fix into position a component or assembly to allow the proper functioning of equipment or system.
Interpolate	To determine or estimate intermediate values from two given values.
Interpret	To translate the meaning of.
Insert	To put in.

Isolate	To separate from another.
Jog	To move; start and then stop quickly.
Letdown	To descend.
Lineup	To organize in a linear or sequential arrangement.
Load	To place power output on line.
Locate	To find a particular spot or place.
Lock	To secure by key or combination; to restrict the action of by fastening.
Log	To record required information in a book.
Lower	To decrease in elevation.
Lubricate	To make smooth or slippery by applying a substance capable of reducing friction.
Maintain	To keep in an existing state.
Manipulate	To operate mechanically or with skillful hands.
Measure	To regulate by a standard.
Mix	To combine or blend.
Monitor	To check or observe the operation of a system and its components over a period of time.
Move	To go or pass from one place to another with continuous motion.
Multiple	To increase in number greatly or in multiples.
Neutralize	To counteract the activity or effect; to make electrically inert.
Notify	To give formal notice to.
Observe	To watch with careful attention.
Obtain	To hold on to; to gain by planned action.

Open	To make available for entry or activity.
Operate	To start, stop, or influence the operation of a specified component or system.
Organize	To arrange into a coherent unit or function.
Overhaul	To restore to a completely serviceable or operational condition as prescribed by maintenance standards.
Override	To bypass the action of an automatic control.
Perform	To carry out an action, to conform to a prescribed procedure.
Plan	To devise or formulate a program of future or contingency activity.
Plot	To represent by means of a curve constructed by placing points on a graph.
Position	To place a control in a discrete state.
Prepare	To get an item ready for delivery or operation.
Pressurize	To apply force in a contained vessel.
Prime	To prepare for work by filling or charging with something.
Print	To produce something in printed form.
Pull	To draw out or hold back.
Pump	To raise, lower, transfer, or compress fluid or gasses by suction or pressure or both.
Push	To force away.
Purge	To free of sediment or relieve of trapped air by bleeding.
Rack In/Out	To insert or remove the breaker from the cabinet.
Raise	To increase in elevation.
Reactivate	To cause to become active or functioning again.
Read	To understand visual information which is presented symbolically by scanning.

Realize	To bring into existence.
Rebuild	To restore unserviceable equipment to a like-new condition in accordance with original manufacturing standards.
Receive	To be given written or verbal information.
Recirculate	To begin flow again.
Record	To write information or document events or trends.
Release	To set free.
Remember	To retain information or to recall information.
Remove	To take away.
Repair	To restore serviceability to an item by correcting specific damage, fault, malfunction, or failure in component or assembly.
Replace	To substitute serviceable component or assembly for an unserviceable counterpart.
Report	To give an account of; a formal document of proceedings of a meeting.
Request	To ask for information.
Respond	To react in response; to answer.
Return	The act of restoring something to a former state or condition.
Rinse	To clean by flushing with liquid.
Run	To continue in force or operation.
Sample	To draw a specimen for judging the quality of the whole.
Scan	To read hastily.
Secure	To protect from damage; to control access.
Select	To choose from a group.
Sequence	To arrange in order.
Service	To keep an item in proper operating condition.

Shut	To stop or suspend operation (see close).
Shutdown	To stop or suspend operation (see close).
Sketch	To draw roughly.
Spray	To apply a jet of vapor or mist.
Start	To begin to set in operation.
Start Up	To start.
Stop	To close or cease (see close).
Store	To lay away for future use.
Stow	To store.
Switch	To shift to another electrical circuit; to exchange.
Subtract	To take away by reducing.
Supply	To provide or furnish.
Synchronize	To arrange operations to occur simultaneously.
Telephone	To communicate by phone.
Test	To verify serviceability and detect failure by measuring against prescribed standards.
Throttle	To decrease the flow of; to regulate the speed of.
Titrate	To determine the strength of a solution or the concentration of a substance in solution in terms of the smallest amount of a reagent of known concentration required to bring about a given effect in reaction with a known volume of a test solution.
Total	To add up; to compute.
Trace	To discover signs, evidence, or remains of.
Track	To be aware of a progression of activities.
Transfer	To convey from one place or situation to another.

Transmit	To send or transfer from one person to another.
Transport	To transfer or convey from one place to another by mechanical means.
Trip	To remove from service rapidly.
Tune	To adjust to respond to radio waves of a particular frequency.
Turn	To rotate or revolve.
Type	To operate a keyboard.
Unlatch	To open or loosen by lifting a latch.
Unload	To take off.
Upgrade	To raise the quality of; to improve.
Update	To bring up to date; to revise.
Unlock	To unfasten; to free from restraint.
Uncouple	To detach or disconnect.
Vent	To release gas, liquid, or pressure.
Verify	To confirm the accuracy of.
Ventilate	To expose to air.
Wait	To expect or remain in readiness.
Warm	To make ready for operation by preliminary exercise or operation.
Weigh	To ascertain the heaviness of.
Withdraw	To remove from use.
Zero	To adjust to zero.
